

COMPACTION RANGE

# TEN

## Reversible plate compactors

The TEN 25/30 range of reversible Plate Compactors are the best option to work on granular materials.

- Optimum frequency and amplitude for compaction
- Different manufacturers petrol and/or diesel engines options
- Dead man system
- Optional polyurethane sheet for paving stone compaction
- Eccentric system to easily adjust the belt tensioning
- Optional transport system

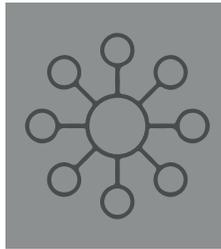

**+ Absorption system**

Designed for ergonomic work thanks to their vibration-absorbing handle.

**+ Adaptability**

The TEN 25/30 allows the adjustment of the tray through its progressive control, adjusting to all types of work.

**+ Complete range**

Complete range with different motorizations that adapt to each client.

**+ Easy maintenance**

Quick access to its different components, thus facilitating its maintenance

**Technical Data**

MODEL	Weight without fuel (kg)	Centrifugal force (N)	Speed (m/min)	Dimensions (WidexLongxHigh)	Plate length (mm)	Engine	Fuel	Frequency (vib/min)	Power (CV)
